

This is one of the stupidest plans to come to Portland. The dangers of pollution and explosion to our citizens and infrastructure are enormous. The only benefit to our city will be some jobs to build the tanks and other structures and a huge profit to Pembina. If Pembina wants to send all this pollution to Asia, let them do it from the beautiful port in "Vancouver B.C. We do not need it here. This is a foolish idea for Oregonians to accept. Please vote against this plan.
