To: Planning and Sustainability Commission

Subject: Proposed Propane Export Terminal

To Whom It May Concern:

My name is Michael Barnes and I am a resident of Portland, OR. I am heartened by the recently awarded title of "climate champion" given to our city by the White House. It means that our city is pushing against the infrastructure promoting the continued use of fossil fuels, which have been polluting our air and water for decades. It means that we are reaching out beyond our city to inform others, to empower them to stand for their communities, to say that we envision a world where this is no longer acceptable. That is what we are saying. We oppose projects that would install infrastructure for coal, oil, & natural gas, as these resources require the pollution or destruction of our special places. Not if an accident occurs, but simply as a part of doing their business. As a citizen of this community, I stand for maintaining our special places and continuing to be 'climate champions'.

Thank you,

E. Michael Barnes
