This email is for Cal Nimer, I apologize in advance if I have misspelled your name. My name is Philip Sydnor. William Hawkins and I are architects in Portland, Oregon. John Reilly, our client, for a new 6 story condominium project in Portland, asked that we contact you regarding stone cladding which your company produces. I have attached a rendering of our design.

The entire exterior of the building is intended to be clad in stone, preferably no thicker than 1" with a smooth finish, not polished however. We are currently working with engineers to determine how the stone cladding will be attached to the structure. We are considering attaching the stone with Preassembled Stone Panels which would require metal supports and metal connections fastened directly to the stone. This system would also require reveals cut into the stone panels.

The exterior of the building also has several architectural stone features including stone columns, stone window surrounds, stone window sills, stone belts, stone cornices, etc.

Can you please supply me with information for the following:

- Stone types you offer
- Stone finishes
- Thickness
- Sizes available
- Weight
- Do you provide stone paneling with pre-inserted metal connections/ clips?
- Do you provide stone architectural features as listed above and as shown in the attached rendering?

Do you have a website? Any information, brochures, specifications, etc. you can provide us will be greatly appreciated. Please feel free to call me, we are 10 hours behind your time.

Thanks so much,  
Philip Sydnor

Hi Phill

thanks for your email and I would like a description of the details of the cladding itself for the stone and the shape of it so we can have an accurate reading for your requirements.  
Feel free to email me all day long and take your time for gathering things

Thank You

Kal Nimer

Legend Stone

Philip

Regarding types of stone

We have

Travertine, yellow, creme, light creme  
Elegance, rose, Light rose  
Legacy, gray, karara  
Onyx, dark, medium, light  
Lime, Dark, Med, Light ( Dark is gray 33%)  
Rockface, marble vane light creme  
Dazzel, whitish group

Finishes,  
Rubble  
Rockface  
Mufajar( Out & In In the stone random shape of looks  
Sand blast  
Horizontal Lined dressing  
Tumbling  
Rough Chiseled  
Smooth  
Sanded  
Shiny

Thickness

From 11/2 CM - 40 Cm

Sizes

Cut To Size No Problem what so ever in dimentions.

Weight

According to Dimentions and stone type and finish.

Pneling and attaching.

You can use the ceramic cement panels used for tilling bath room floors, which is can be attached to it and mounted later on on walls or attaching panells first on walls and then attaching stone either is possible. screws and bolts required and clips are available too. which is male and females up to down.

Please feel free to ask

Thank You  
Kal Nimer

Kal,

Thanks a lot, this information helps. Can we request samples at some point in the near future? I am currently figuring out total areas of stone as well as standard shapes and sizes. I will have someting available soon.

Thanks again,  
Phil

Josh, the information regarding the company's proposed paneling is toward the bottom. I look forward to reviewing the details you were telling me about. Thanks a lot,  
Phil

Phil

I think John tried to send me a list you have prepared for stone samples for me to be priced, but the attachment did not open, so may be you can send me that again.
