To: Planning Commission Members

We feel very strongly that the proposed bike pathway would not add enough significant recreational opportunities to offset the negative impacts which it could create. Our concerns focus mostly on the increased traffic, noise, and trash which can accompany more public access in what is intended as private areas.

We hope you will take these concerns into consideration and, hopefully, decide that the proposed project is neither desirable nor needed.

Thank you for your consideration.

David May and Christine Parno
