Subject: Bike Path on Hayden Island in the Comprehensive Plan

Hello Commissioners;

I live along the Columbia River in the Hayden Island Manufactured Home Community, I love it here, I plan on living here for many many years ...

- Please remove the proposed Hayden Island Bike Way from the The Comprehensive Plan Transportation System Plan (TSP)

- If not removed from the plan, the Bike way will impact, remove, destroy, eradicate 122 homes within our community - the homes fronting the river and north harbor.

- When these homes are removed, our whole community will be folded because of the lost of revenue to our landowners.

- This is a bad plan and the bike way needs to be a street bike path and not a path along the river destroying, impacting, ending this community.

Thank You,

Herman Kachold
