Proposed Changes to Portland City Code 17.38

Amber Clayton, Environmental Program Manager

Angela Henderson, Sr. Policy Analyst

Bureau of Environmental Services

July 6, 2016

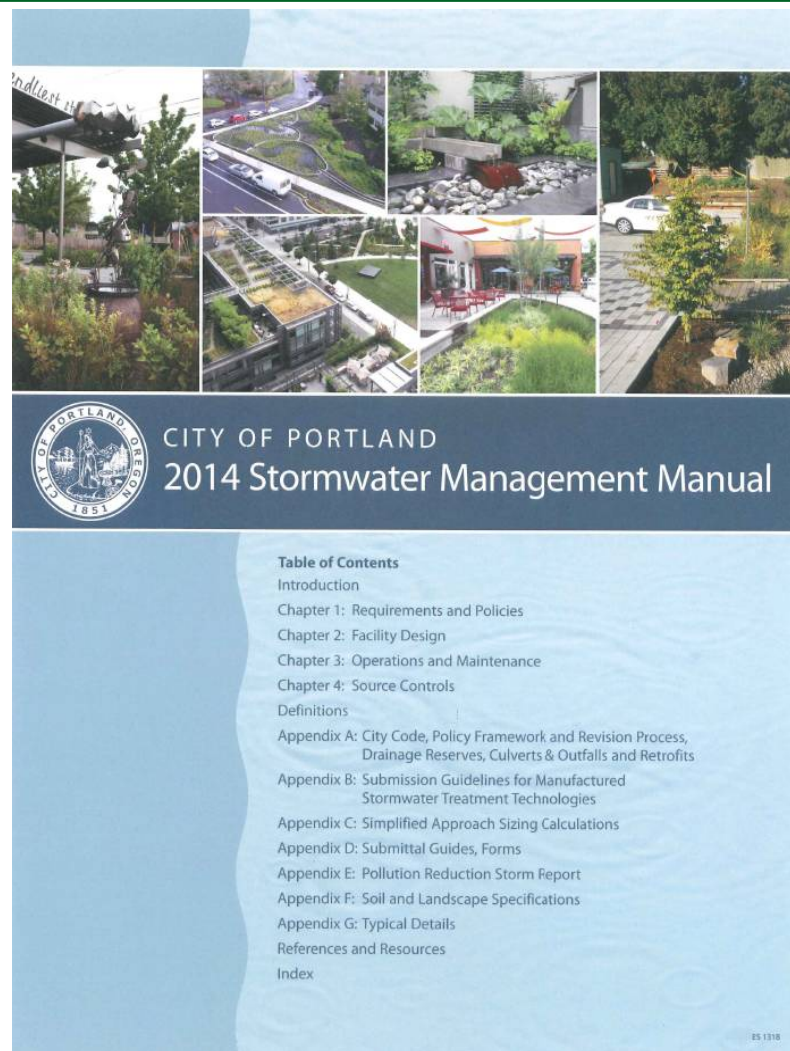

ENVIRONMENTAL SERVICES
CITY OF PORTLAND

NICK FISH, COMMISSIONER
MICHAEL JORDAN, DIRECTOR

Background

- PCC 17.38 authorizes BES to implement a Stormwater Management Manual (SWMM)
- The SWMM includes both impervious area requirements and source control (activity-based) requirements for development

Background

- BES is proposing moving the source control requirements to a separate Administrative Rule
- Minor code changes to PCC 17.38 are required to authorize BES to implement a Source Control Manual

CITY OF PORTLAND
BUREAU OF ENVIRONMENTAL SERVICES

SOURCE CONTROL MANUAL

Summary of Proposed Code Changes

1. Include specific authorization of the Source Control Manual
2. Update Administrative Review and Appeal language
3. Clarify that removal of a required stormwater facility is a violation
4. Correct typographical errors and misspellings

Summary of Public Outreach

- Public Comment Period:
April 4 - May 6
 - Proposed revisions to 2014 SWMM
 - Proposed SCM
 - Proposed changes to 17.38
- Notice published in DJC and The Oregonian
- Utilized PortlandOnline subscription and notification services, BDS Plans Examiner, social media
- Zero comments received on proposed changes to PCC 17.38

Proposed Stormwater Management Manual (SWMM) Revisions

The federal Clean Water Act and the Safe Drinking Water Act require Portland to implement post-construction stormwater management for both private property and the public right-of-way. Portland developed its Stormwater Management Manual (SWMM) in 1999 and has revised it several times, [most recently in 2014](#). The city is currently updating the SWMM.

BES is accepting [public comment on the proposed changes](#) through 5:00 p.m. May 6, 2016. Public comments may be submitted by mail or email to the contact listed below.

Impacts of proposed changes to 17.38

- No financial impact to City
- No new financial impacts to development projects

Following Adoption of Code Changes

- 2016 Stormwater Management Manual and 2016 Source Control Manual will be adopted on August 12, 2016*
(*based on anticipated effective date of code changes)
- Three-month phase-in window where 2014 SWMM or 2016 SWMM/SCM available to the development community.
- 2016 manuals will be required as of November 14th.
